

AN ISO 9001 : 2008 COMPANY

# HYDRAULIC AIRCRAFT JACKS

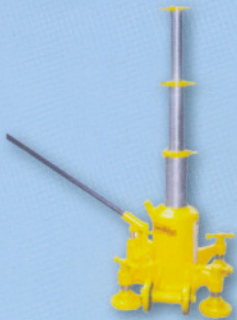

**VTEJ-5/665**  
TELESCOPIC JACK-3 STAGE  
WITH WHEELS AND  
STABILIZERS AND INTEGRAL  
PUMP

The air corridors of the Indian sky are frequented by a host of National and International airlines bringing countries closer everyday. Indian Air Force's expanding fleet of several diverse types and sizes of aircrafts keep an ever watchful vigil over the country's frontiers. Air India, Indian Airlines and private ATO, using an equally mixed fare of flying machines, turn the vast spaces between the far flung cities of this subcontinent into hailing distances.

Providing a vital piece of ground equipment within this given situation has been an exciting adventure of engineering improvisation against peculiar odds. In over fifty years over hundred different types of Hydraulic Lifting Jacks have been developed from the drawing board to extensive and intensive trial stages. This catalog exhibits the full range as of yesterday.

For obvious reasons it was not possible to incorporate complete technical data and other relative information in this catalog. Customer is requested to write to us for detailed technical specification drawing on the type suited to his individual requirement.

- VANKOS Aircraft Jacks are entirely constructed from selected alloy steels, ground and honed to high precision micron finishes and electrically welded for greater strength and safety.
- Fast and easy maintenance – spares & service country wide.
- Excellent product support and maintenance facility.
- Simple in operation.
- Effortless, time saving and safe.
- Widest selection of standard capacities.
- Reliability through proved and accepted highest standard of quality product performance.
- Each product goes through a series of checks and tests to confirm to Bureau of Indian Standards and International Standards.
- Special purpose custom built (Made to Order) models on request.
- Other models of different capacities and strokes can be manufactured on short Delivery.
- Good inventory of spare parts and allied equipment.

**VTEJ-3/575**  
TELESCOPIC JACK-3 STAGE WITH  
WHEELS AND STABILIZERS AND  
INTEGRAL PUMP

**VAJ-15/787**  
SINGLE STAGE JACK WITH WHEELS  
AND STABILIZERS AND DOWTY PUMP

CUSTOMERS TO PROVIDE THE FOLLOWING DETAILS TO US TO OFFER THEM A BEST POSSIBLE SOLUTION: CAPACITY ,  
HYDRAULIC LIFT, CLOSED HEIGHT AND JACKING PAD DIMENSIONS (OPTIONAL : APPLICATION , AIRCRAFT MODEL , SINGLE STAGE ,  
2-STAGE OR 3-STAGE JACK AND ANY OTHER IMPORTANT INFORMATION ).

HYDRAULIC POWER FOR ALL APPLICATIONS
